Summary: On May 18, 2005, Colin E. Cushnie, Director of Regulatory Policy and Affairs of Southern

California Edison Company (SCE), met with Stephen St. Marie, advisor to Cmmr. Bohn, in San Francisco. Written materials (attached to the notice) were used. Cushnie stated that all the comments filed by the generation community in support of the "Top Down" Resource Adequacy methodology explicitly or implicitly call for the immediate creation of a bilaterally traded capacity-only product for Load Serving Entities (LSEs) to procure to demonstrate compliance with the Commission's adopted Resource Adequacy requirements. Cushnie indicated that the immediate creation of a capacity-only product without the centrally administered market structure and safeguards found in the capacity markets of the Eastern United States would expose customers and LSEs to undue risk. Cushnie further identified several unresolved issues surrounding the potential adoption of a capacity-only product. Cushnie also highlighted the numerous mischaracterizations that were expressed by the generation community regarding the merits and mechanics of the "Bottom-Up" methodology that SCE and the Joint Parties sponsored.
